The impact of migrating our applications to Azure and allowing the team to decommission our W2K8 severs has long lasting implications to our ability to support our infrastructure, modernize our applications and protect Chevrons people and assets. Thank to the Enterprise Solutions team, you were able to do this ahead of schedule and on budget. Well done team.

CEMREC IT, CBRES Operations Support Centralized Services Delivery, Sodexo, and SCLogic had to overcame several obstacles including a global pandemic to implemented the cloud-based software solution for our Accountable Mail functionality. The team successfully replaced the BearTracks solution for Accountable Mail tracking system with SCLogic's Intra Enterprise system. Support for the tool was successfully outsourced through this effort. Congratulations Team on job well done.
